Art Unit: 3671

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-13, drawn to retaining structure, classified in class 403, subclass 367.
- II. Claims 14-30, drawn to a knock-on sweep, classified in class 172, subclass 730.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as being used to retain excavation teeth, and invention II has separate utility such as being used with a different type of retaining structure including bolts or pins. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
